

The RMS 550 range of zone 2 fluorescent luminaires is manufactured from AISI304 stainless steel. The body is fabricated from a single sheet of steel with no invasive mounting holes to minimize the risk of water ingress through the housing. The tempered glass window minimizes the risk of light output loss over time due to polycarbonate yellowing. The RMS range is ideally suited for on and offshore and marine environments and all kinds of industry where there is a high level of corrosion.

Specifications

Material	Stainless Steel AISI 304/AISI316 , 0.8 mm thickness and transparent part in tempered glass
IP Rating	IP66
Temperature	-30°C to 55°C
Approvals	
- Atex	INERIS 01ATEX3002X
- GOST	GOST Certificate
Standards	EN/IEC: 60079-0, 60079-15 EN: 61241-0, 61241-1

	According to European Directive 94/9/EC (ATEX) For Zone 2 and Zone 22
Gaskets	Special cross section tightness gasket, silicon rubber made (close cells) located in housing channel between body and window frame.
Entries	Body complete of two diam. 21mm through holes for cable entries, one complete of metallic plug with lock nut and gasket, and the other one with plastic plug for dust protection.
Hardware and Screw	AISI 304 Stainless Steel external hardware and screws
Lamps	RMS Series is suitable for two pins fluorescent lamps G13 socket PHILIPS TL-D or equivalent. (lamps excluded)
Lamps Wattage	18 / 36 W
Ballast	High-frequency electronic ballast conforming with EN 60079-15 and IEC 60079-15
Rated operation voltage (UE)	220-240 V
Frequency	50 ÷ 60 Hz
Power factor	> 0.95
Accessories	Suspension mounting kit "G1" AISI 304 made
Available upon request	Pole mounting kit "P12" 1 ½" size AISI 304 made Wall mounting kit "H1" AISI 304 made
Emergency Service	RMS 550 lighting fixtures for Emergency Service are available: RMS 550...PNL/LE-P
Note	<p>Very low pollution at the end of operative life time of lighting fixtures. The inorganic materials used for RMS, like stainless steel and glass, allow a recycle of 95%, only electrical components and insulation of single core wires need some more care.</p> <p>No through holes between inside and outside of luminaires, out of holes for power supply cable whatever protected by a suitable waterproof cable gland (on request). Therefore, during the time, release would be possible where, for fixing devices, there are through holes and relevant gaskets.</p>
